EDUCATION

B.E. in Artificial Intelligence & Data Science — *Guru Gobind Singh College of Engineering & Research Centre, Nashik (SPPU)*

Expected Graduation: 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Artificial Intelligence, Cybersecurity

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS

Frameworks & Libraries: React.js, Three.js, TensorFlow, Keras, OpenCV, Flask, FastAPI

Databases: MySQL, MongoDB, SQLite

Cloud & DevOps: Docker, AWS, Cloudflare Tunnel, Git/GitHub

Operating Systems: Linux (Ubuntu Server, Fedora, Kali, Mint, Ubuntu), Windows, macOS

Tools: VS Code, Jupyter Notebook, Google Colab

PROJECTS

Automated Brain Tumor Detection System

- Engineered a VGG16 transfer-learning CNN pipeline in Keras/TensorFlow that classified brain MRI scans as tumor/non-tumor with 99% test accuracy, outperforming a baseline CNN (92%) and ResNet50 (96%).
- Resolved data-scarcity and overfitting issues through image augmentation (rotation, flip, scale, shift) and fine-tuning of ImageNet pretrained weights.
- Built a REST API (Flask + FastAPI) integrated with a React.js frontend for real-time predictions with confidence scores; deployed on Vercel.
- Published results in a peer-reviewed journal (IJPREMS, Vol. 6, 2026).

Sage AI — Voice-Controlled Desktop Assistant

Built a Jarvis-style voice assistant integrating Google Gemini AI (gemini-1.5-flash) for conversational responses with memory retention across a session.

- Implemented 10+ voice-triggered automations — YouTube playback, WhatsApp/email messaging, Wikipedia lookups, app launching, to-do management, and system shutdown/restart — using speech_recognition, pyttsx3, pyautogui, and pywhatkit.
- Presented at a national level hackathon.

Guardian — AI-powered Gmail Phishing Detection System

- Built an AI-powered ML-based Gmail phishing detection system for real-time email threat detection using OAuth 2.0 and MongoDB.

CloudNest — Self-Hosted Home Server

- Architected and secured a privacy-first home server on Ubuntu Server (LVM) running Nextcloud, Immich, and AdGuard Home for personal cloud storage, photo backup, and network-wide ad blocking.
- Hardened remote access with a Cloudflare Tunnel and DNS-over-HTTPS, prioritizing data security given the volume of personal data hosted.
- Deployed ONLYOFFICE Workspace as a self-hosted, privacy-respecting alternative to Google Docs.

Diploma Admission Management System

- Built the frontend for a Python-based system automating student registration, document verification, and merit-list generation, tested with 1,000+ student records; co-authored a peer-reviewed publication on the system (IJPREMS, Vol. 5, 2025).

INTERNSHIP EXPERIENCE

AI-ML Virtual Internship — *Google for Developers / AICTE EduSkills* | Jul–Sep 2024,

Artificial Intelligence and Data Science Intern — *Sunanda Infotech Pvt. Ltd.* | 45 days | Offline

PUBLICATIONS

- “Automated Brain Tumor Detection from MRI Images Using Convolutional Neural Networks,” IJPREMS, Vol. 06, Issue 04, April 2026, pp. 867–870.
- “Direct Second Year Diploma Admission Management System Management Using Python,” IJPREMS, Vol. 05, Issue 04, April 2025, pp. 2416–2419.

CERTIFICATIONS

- AI Engineer Professional Certificate — Udemy / School of AI (Dec 2025)
- AI Engineer Associate Certificate — Udemy / School of AI (Mar 2026)
- Foundations: Data, Data, Everywhere — Google / Coursera (Nov 2024)

ACHIEVEMENTS & LEADERSHIP

- Technical Head, AI & Data Science Student Association
- Participated in various hackathons including INNOV-ERA, Elvion 2026, TechMyst 2026, and an IEEE-sponsored event.
- Received a Leadership Certificate of Appreciation for co-executing an IIT Delhi alumnus-led Generative AI workshop (NxtWave); Member, Entrepreneurship Development Club and Coding Club; Sports Coordinator.

LANGUAGES

English, Hindi, Marathi
